Abstract in Times New Roman font, size 11. **The abstract should not be longer 10-12 lines.** It must discuss the content of the paper, identify its goals, methods used and main conclusions

Key words: 3-6 key words divided by commas (without a period at the end)

JEL: 1-3 JEL classification codes divided by commas – the codes can be found online at <http://www.aeaweb.org/econlit/jelCodes.php?view=jel> (e.g. L93, K41)

Introduction

The text of the paper should contain a minimum of 18,000 characters. Please use font Times New Roman, size 12, single spacing between lines throughout the text. The text should be aligned to both margins (justified). Each new paragraph should be indented from the left margin by 1.25 cm.

For section titles, please use Times New Roman, size 13, bold. All sections should be numbered in sequence, except for the introduction and conclusion, which are not numbered. The section titles are centered in the middle of the line. Do not use subsection titles unless absolutely necessary. In that case use Times New Roman, size 12, bold, for subsection titles. Subsection titles are aligned to the left.

The introduction should state the goals of the research and briefly present the applied methods.

1 Title of section

Use footnotes for citations and references. The style to be used is as follows – SURNAME, F. (year): Title of the book or paper, page.² The ISBN identification is not stated in the footnotes. Full reference (including internet link, if applicable) should be given at the end of the paper in the “References” section.³

Equations should be created in Microsoft Word, using italics. All equations should be numbered at right. Please leave a blank line before and after equation.

¹ Indicate source of finance for your research (if applicable) – e.g. specific grants, etc.. Acknowledgements. Miscellaneous notes (e.g. – the author is a PhD. student; the author works for multiple institutions, etc.).

² HIRSCHMAN, A. O. (1945): National power and the structure of foreign trade, p. 148.

³ IMBS, J. – WACZIARG, R. (2003): Stages of diversification, p. 276.

$$Hirschman_i = \sqrt{\sum_{j=1}^n \left(\frac{x_j}{x}\right)^2} \quad (1)$$

To better present results of the research, it is possible to use tables and figures. All tables and figures must be referenced in the text of the paper (figure 1). Titles of all tables and figures must be clear and concise (table 1). The content and message of all tables and figures must be obvious – the readers should not be required to read the text of the paper to understand them.

Figure 1: Relation between index of intra-industry trade and export concentration in 180 countries of the world in 2012

Note: If necessary, attach a note under the figure. Use Times New Roman, size 10. Example: Own calculations.

Conclusion

The last section concludes the paper – it discusses the results of research, presents its importance and contributions to literature and mentions its possible shortcomings. The conclusion should not include any important information that has not been previously mentioned in the text.

In the “References” section, all sources are listed alphabetically.
