## PROFILE

As part of my research, I focus on issues related to the negative aspects of the law of armed conflict, such as international criminal justice and transitional justice and forced migration, as well as on specific issues related to the protection of the most vulnerable groups such as children and "child soldiers". In this context, my research activities further focus on the position of a state affected by armed conflict in the international community vis-à-vis other states as well as international organizations - and thus on issues of humanitarian and development aid and international development and financial law.
